UNDERSTANDING THE GREAT CONSPIRACY

"The modern godless world is waging a war on Islam, and it is time that Muslims wake up to that fact and respond to it appropriately. No one can possibly respond appropriately to a challenge unless and until he first recognizes and understands the nature of the challenges. And that is the purpose of this monograph : to teach Muslims to recognise and understand the nature of the challenge involved in the destruction of the Khalîfate and the emergence of the Saudi-Wahhâbî Nation-State on its ruins. It also seeks to provide Muslims with the means whereby they can avoid being duped, and led astray, by those who have betrayed Islam in order to seek the good of this world."
